

What is claimed is:

1. A recording medium comprising:  
image information;  
an information outputting program for outputting a  
computer images based on the image information, and  
an automatic copying program for automatically saving  
copy information of the image information and the information  
outputting program in a specific location of the computer.
2. The recording medium of claim 1, wherein the automatic  
copying program automatically saves a part of the image  
information and the information outputting program in the  
computer at the specific location.
3. The recording medium of claim 1, wherein the specific  
location is either an internal disk of the computer, or an  
internal disk of another computer that is connected to the  
computer through a network, or a recording medium in which  
information can be stored by a recording apparatus that can  
be connected to the another computer.
4. The recording medium of claim 1, further comprising:

music song audio information;

wherein the information outputting program to display in a selectable manner the storage location for the music song audio information, and to control a computer to function as a simultaneously outputting section to simultaneous outputting images based on the image information and music song audio based on selected the music song audio information,

wherein the automatic copying program to control a computer to function as a saving section to automatically save copy information of the image information, selected the music song audio information, and the information outputting program, in the specific location of the computer.

5. The recording medium of claim 1, further comprising:  
unique identification information;

wherein the automatic copying program to control a computer to function as a saving section to automatically save copy information of the information outputting program in the specific location of the computer, acquires information storage area at the specific location corresponding to the identification information, and

automatically saves in the information storage area the copy information of the image information.

6. A recording medium comprising:

image information;

an information outputting program that outputs to the computer images based on the image information, and

an automatic copying program that automatically saves in a specific location of the computer the image information and the information outputting program, are stored in the recording medium;

wherein the image information includes plural processed image information having different resolutions.

7. A recording medium of claim 6, wherein the plural processed image information is at least screen data for display in a display device.

8. A program to control a computer to function as automatically saving section that to save at a specific location of the computer the copy information of the image information and the information outputting program that outputs images based on the image information.
